

Developer

Jared Goldman

Profile

Skill-driven full-stack developer, open source contributor and musician motivated by curiosity and learning. Former military professional. Lover of coffee, fitness and meditation. My experiences as a sailor and musician give me a diverse toolkit for solving problems and providing value.

Experience

September 2023 – Present

OSF Management – Software Developer

Successfully delivered high-impact technical solutions including development of a comprehensive full-stack loan tracking system with market potential, currently being prepared for commercial release as a whitelabel product. Engineered an advanced data ingestion pipeline framework that significantly enhances reliability, observability, and performance when processing vendor data.

January 2023 – August 2023

Canadian Broadcasting Corporation – Senior Developer

Managed Typescript adoption, enhancing developer productivity and experience. Performed comprehensive security audits on codebases and spearheaded implementation of best practices. Successfully integrated reCAPTCHA v3 into Newsletters service, effectively mitigating DDoS bot attacks. Continuously extended and maintained critical services with a global user base spanning millions.

2022 – 2023

Bitbuy – Software Developer

Headed a developer experience team that successfully implemented a CI/CD pipeline, streamlining the release process and accelerating team release rate by 300%. Developed crucial managed accounts API, enabling the provision of white-labeled services to corporate clients, driving revenue growth. Enhanced performance of React web application, achieving a remarkable 100%+ improvement in speed, leading to superior user and developer experience.

September 2021 – December 2021

Bitbuy – Junior Web Developer

Developed a user-friendly document upload service catering to both users and administrators. Collaborated closely with product and marketing teams to deliver numerous marketing pages powered by Drupal CMS and utilizing GraphQL. Played a pivotal role in improving the Pro-Trade platform, making impactful contributions to its growth and success.
